## Just got a Lowered Seat and Backrest for my 1200Rt

Posted by bglassman - 2008/05/06 19:43

---

I never realized how different the bike would feel with the lowered seat and a backup backrest.

Installed the two today and it makes the bike feel just right. Seems to put me more in the envelope of wind protection. It also changes my reach to the bars so that I am not putting so much pressure on the grips. Hence, I have now less vibrations as well.

Interesting...

Is your lowered seat and back rest from BMW, or aftermarket. Glad you're enjoying that beautiful RT.

BTW, to you still have the Backup back rest for the LT? PM me if you do. Thanks.

The lowered seat is the BMW Gray lowered seat. The back rest is the Backup...

All the LT accessories are sold except for one stock windshield.
