## How to test charcoal canister?

Posted by BobOdenweller - 2008/02/11 11:55

---

Last summer I removed the charcoal canister because I thought it was causing problems. It turned out that the problem was something else and now after riding my R1150RT and putting it in the garage I get a strong gas smell. I would like to reinstall the canister but I want to make sure it is good first. I can blow through it, but it is difficult. Should it be easy to blow?

Anyone with experience interested in helping me put this thing back on?

Bob;

Come on up to Longmont, I have the K1200Lt apart for PM, we can take yours apart too.

I may have to take you up on that. Going to Breckenridge to do some skiing this weekend. I'll watch the weather for another weekend. Thanks, Bob

Bob;

sking is dangerous!! :) Riding motorcycles is much safer! ;) B)

Now if I can just figure how all these LT parts go back together :-)
